## Overview

The Stack Overflow For You feature is a personalized, running feed of notifications, actions, and alerts for each user on the site. The For You page can help you get more from your Stack Overflow site in several ways:

- **Richer knowledge base** For You alerts reveal actions you can take to create a deeper pool of shared knowledge.
- **Up-to-date information** For You alerts help keep content from going stale. You can receive alerts when questions need answers, or when out-of-date content needs a refresh.
- **Streamlined knowledge sharing** For You provides a central location with actions and steps to share your expertise.

## For You notifications

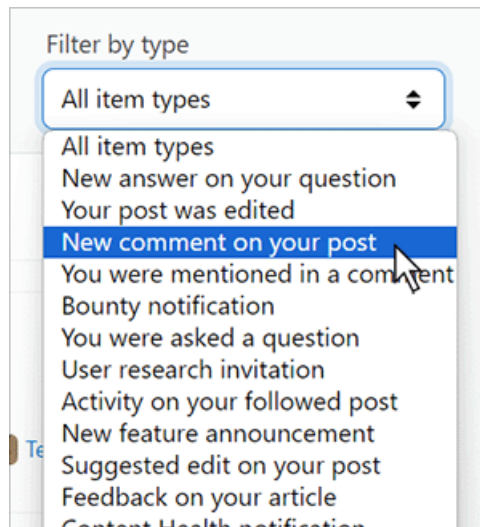

Click the **For You** link in the left-hand menu to go to your "For You" summary page. A blue dot to the right of the link indicates the presence of new notifications.

The screenshot shows the 'For You' page for a 'Your Site Business team'. The left-hand navigation menu includes 'CONTENT' (Questions, Articles, For You, Collections, Bookmarks, Tags) and 'COMMUNITY' (Communities, Users). The 'For You' link is highlighted with a blue dot. The main content area shows '175 unread items' and a toggle for 'Only show unread'. A filter dropdown is set to 'All item types'. The first notification is from Melinda R. with the text 'Melinda R. thinks you may be able to answer this question' and a timestamp of 'Dec 6 at 18:06 Unread'. Below this is a question card: 'How does a client do a "Hard Refresh" of their instance?' with 5 votes, 2 answers, and 40 views. The question is tagged 'self-hosted' and 'product-support' and was asked by Melinda R. on Dec 6 at 18:06. A second notification from Fred Rich is partially visible at the bottom.

## For You filter

You can get up to speed quickly by viewing only unread notifications, or apply one of several different filters.

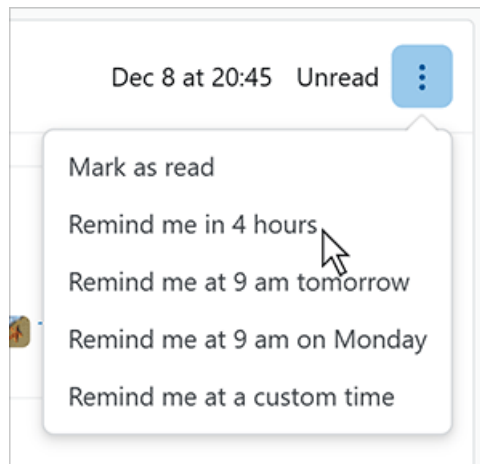

Filters include:

- New answer on your question
- Your post was edited
- New comment on your post
- You were mentioned in a comment
- Bounty notification
- You were asked a question
- User research invitation
- ...and many more

You can also save time by marking all notifications on the page as read with the **Mark all as read** button.

## Set reminders

You can set reminders to complete For You tasks later. Click the **three dots** button in the upper-right corner of any alert to choose a preset reminder. You can also set a custom time and date to receive a reminder.

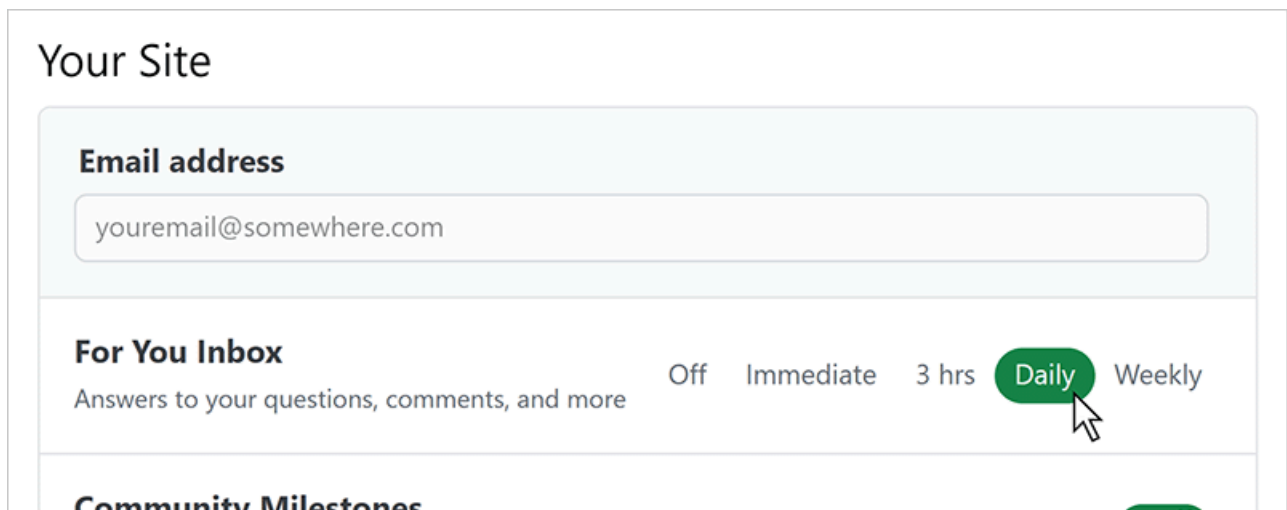

You can cancel pending reminders by clicking the **three dots** button and choosing **Cancel pending reminder**. You can also mark a previously read notification as unread by clicking **Mark as read**.

## For You email digest

You can receive For You alerts to your email inbox. To set up For You emails:

1. Click on your avatar (profile picture) to access your settings.
2. Click **Edit email settings** under the "COMMUNICATION SETTINGS" or "EMAIL SETTINGS" heading.
3. Set how often you'd like to receive **For You Inbox** alerts by email (for example: **Daily**).
