Overview

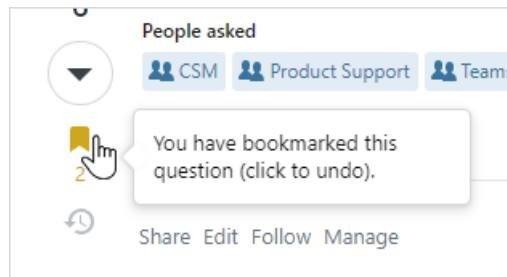

Stack Overflow bookmarks make it easy for you to mark and retrieve your favorite content. You can bookmark questions, Articles, and Collections, and quickly access your content on your personal Bookmarks page.

Bookmark a question or Article

To bookmark a question or Article, click the **bookmark** button under the voting buttons on the left side of the screen.

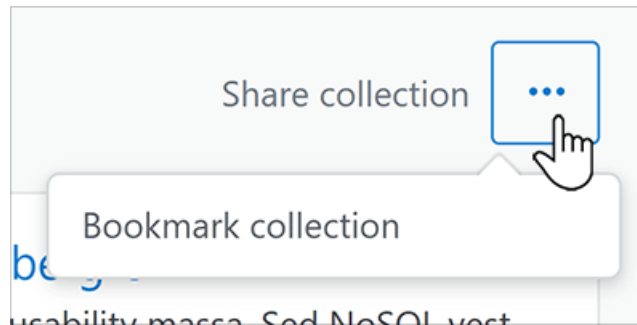

The bookmark turns gold, and the bookmark counter increases by one.

To remove a bookmark, click the **bookmark** button again. The bookmark icon turns gray, and the counter decreases by one.

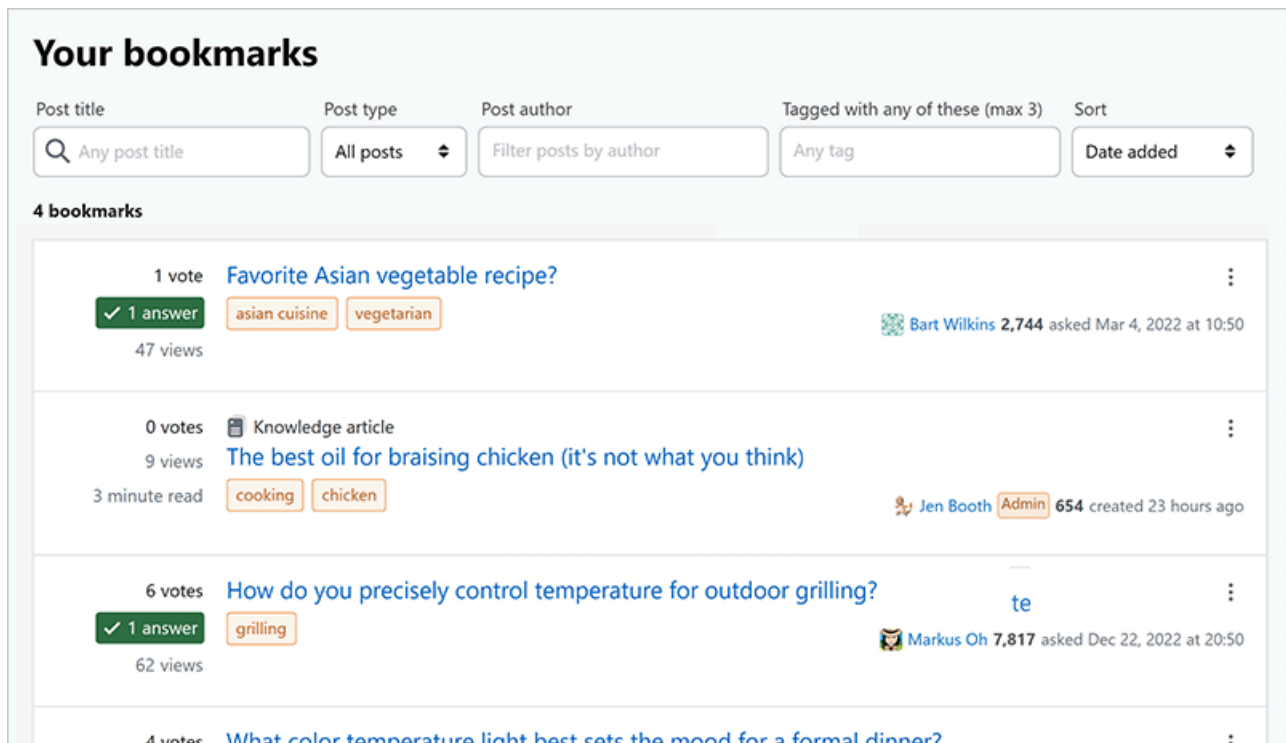

Bookmark a Collection

To bookmark a Collection, open the Collection and click the **three blue dots** button in the upper-right corner of the screen. Select **Bookmark collection** in the pull-down menu.

Access your bookmarks

Access your bookmarked content by clicking **Bookmarks** in the left-hand menu. A list appears, showing your bookmarked questions, Articles, and Collections.

A screenshot of the 'Your bookmarks' page. At the top, there are filters for 'Post title' (with a search box), 'Post type' (set to 'All posts'), 'Post author' (with a search box), 'Tagged with any of these (max 3)' (with a search box), and 'Sort' (set to 'Date added'). Below the filters, it says '4 bookmarks'. The list contains four items:

- 1 vote, 1 answer, 47 views. Title: 'Favorite Asian vegetable recipe?'. Tags: 'asian cuisine', 'vegetarian'. Author: Bart Wilkins 2,744. Asked Mar 4, 2022 at 10:50.
- 0 votes, 9 views, 3 minute read. Title: 'The best oil for braising chicken (it's not what you think)'. Tags: 'cooking', 'chicken'. Author: Jen Booth Admin 654. Created 23 hours ago.
- 6 votes, 1 answer, 62 views. Title: 'How do you precisely control temperature for outdoor grilling?'. Tag: 'grilling'. Author: Markus Oh 7,817. Asked Dec 22, 2022 at 20:50.
- 4 votes. Title: 'What color temperature light best sets the mood for a formal dinner?'.

From the Bookmarks page, you can search your bookmarked content by title, type, author, and tags. You can also sort your bookmarks by date added, newest, or recently edited.

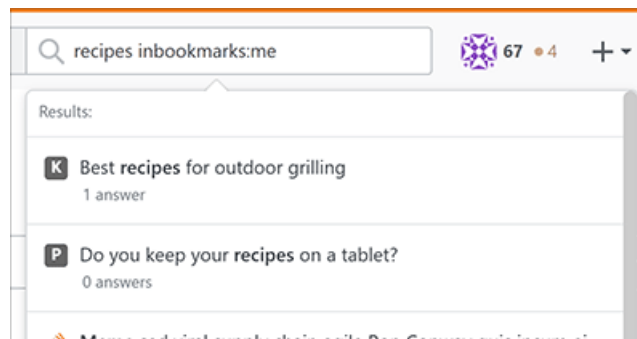

Your bookmarks

Post title	Post type	Post author	Tagged with any of these (max 3)	Sort
<input type="text" value="Any post title"/>	All posts ▾	<input type="text" value="Filter posts by author"/>	<input type="text" value="Any tag"/>	Date added ▾

Search your bookmarks

The `inbookmarks` operator allows you to use the main Stack Overflow for Teams search bar to search your bookmarked content. Unlike the **Post title** search option on the Bookmarks page, using this operator will search the body of your bookmarked content as well as the title.

Enter your search term(s) into the main search bar, then add `inbookmarks:me`. The search will return results only from your bookmarked content.
