### Search through your Team's questions and answers

To search using the Tab app, type

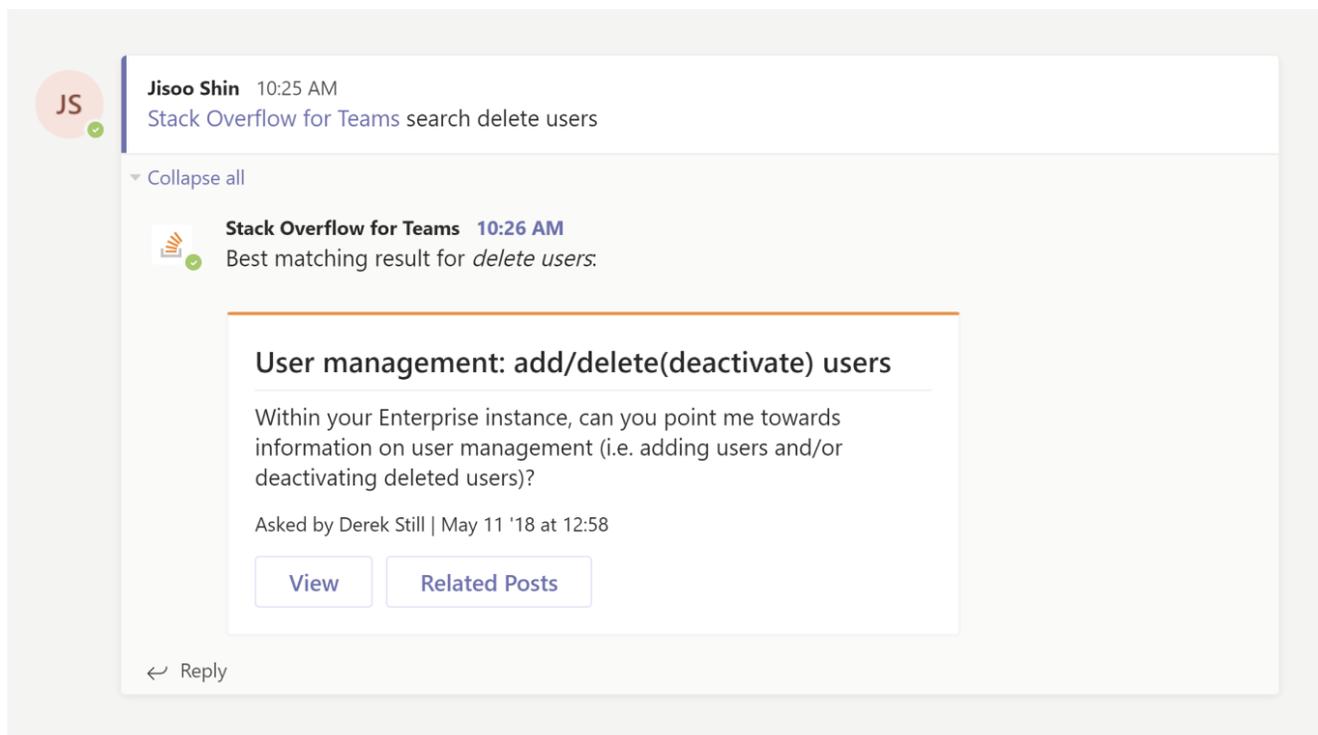

Search [insert what you're searching for]

To search within your channel, type

@Stack Overflow for Teams search [insert what you're searching for]

followed by your search query. Searching through MS Teams mimics the way search works on Stack Overflow. The tips and tricks you use on the website will help you get the right results, faster, right in your Microsoft Team.

If your search query yields a result, you'll see the most relevant result appear as a card, as in the example below.

The screenshot shows a chat interface with a user profile for 'Jisoo Shin' (JS) and a message from 'Stack Overflow for Teams' at 10:26 AM. The message contains a search result card for the query 'delete users'. The card title is 'User management: add/delete(deactivate) users' and the text asks for information on user management in an Enterprise instance. It includes the asker's name 'Derek Still' and the date 'May 11 '18 at 12:58'. There are 'View' and 'Related Posts' buttons at the bottom of the card. A 'Reply' button is visible at the bottom left of the chat area.

You can **View** that question, or click **Related Posts** to see other search results that may be of interest to you.

If there are no matching results, we'll prompt you to ask the question in your Team to capture the knowledge you're looking for.

Stack Overflow for Teams 4:23 PM
