ADMIN PRIVILEGES REQUIRED

Applies to: Free Basic Business Enterprise

Enterprise users can access their documentation [here](#). [Find your plan](#).

Overview

Single Sign-On (SSO) allows you to control access to your Stack Overflow for Teams site using an Identity Provider (IdP). Stack Overflow for Teams SSO uses the Security Assertion Markup Language (SAML) standard. You can learn more about SAML in our [SAML Authentication Overview](#) article.

THIS ARTICLE APPLIES TO STACK OVERFLOW FOR TEAMS BASIC AND BUSINESS ONLY.

Stack Overflow for Teams Enterprise users should read [this article](#) instead. [Find your plan](#).

With SSO set up, your IdP will handle authentication of users. Only users you've granted access to will be able to log in to your site.

To get started setting up SSO on your Stack Overflow for Teams site, select your IdP below for step-by-step instructions:
