This documentation is for **Stack Overflow for Teams Enterprise**. Free, Basic, and Business users can access their documentation [here](#). [Find your plan](#).

Overview

The Stack Overflow Visual Studio Code (VSC) extension can search your private Stack Overflow for Teams site, the public Stack Overflow site, and the internet at large. This allows the extension to access vast amounts of information to provide explanations, insights, and potential answers to your search questions—right inside VSC.

If the result of your AI search is an answer that will benefit your community, the Draft Article feature makes it easy to create a new Stack Overflow for Teams article based on the conversation.

NOTE: Before you can use the OverflowAI Draft Article feature, you must first install the Stack Overflow for Teams Visual Studio Code extension by following [these instructions](#). Your Stack Overflow site must also have [Unified Search](#) enabled.

Create an article from your AI chat transcript

To generate an article draft from your AI chat transcript:

1. Beneath the extension's answer, look for "Did this solve your problem?". Click the **thumbs-up button** next to the text.

2. Select your feedback for the answer, and click **Submit**.

What aspects of the answer did you like?

What would you like to know?

3. Beneath the "Do you want to share this conversation as a knowledge article?" prompt, click **Yes, help me draft**.

▼ Thanks for your feedback

i Info

Do you want to share this conversation as a knowledge article?

What would you like to know?

4. The Stack Overflow Extension will then generate a new file in your IDE, using the Markdown format.
5. To have the extension turn the OverflowAI-generated file into a new draft article on your Stack Overflow for Teams site, click the **Submit post** (cloud upload) button in the upper-right corner of the window.

You can then edit and publish the new article draft on your Stack Overflow for Teams site.

NOTE: You can also copy and paste the contents of the Markdown file on your Stack Overflow for Teams site to manually create a new article.

If you need further support or have questions, contact your site administrator.
