## Search your bookmarks

A `inbookmarks` operator allows you to use the main Stack Overflow for Teams Enterprise search bar to search your bookmarked content. Unlike the **Post title** search option on the bookmarks page, using this operator will search within the body of your bookmarked content as well as the title. Enter your search term(s) into the search bar, then add `inbookmarks:me`. The search will return results only from your bookmarked questions (and articles for Business users).

For more information on available search operators, see the [Search](#) article.
