Overview

Stack Overflow for Teams Enterprise (SOE) stores search query logs in a database. You can access these logs on a dedicated SOE report page to get insights into your users' search activity.

Access the search history report

For statistics about the terms your users are searching for, go to your site's search history page at [https://\[your_site\]/developer/search/log](https://[your_site]/developer/search/log). This report shows how often users enter specific search terms, and what the most common terms are.

Search History

Search log/history for this site

Number of Searches in the last 24 hours: **17**

Number of Searches in the last week: **21**

Number of Searches in the last 30 days: **21**

Recent Search Activity

Original	Parsed	Resulting Query	IP	Time
"markdown format image"	"markdown format image"	"markdown format image"	1.22.33.44	3 mins ago
markdown format image	markdown format image	markdown format image	1.22.33.44	3 mins ago

django	django	django	1.22.33.44	4 mins ago
responsive CSS library	responsive CSS library	responsive CSS library	1.22.33.44	5 mins ago
javascript iteration	javascript iteration	javascript iteration	1.22.33.44	5 mins ago
"AI prompt engineering"	"AI prompt engineering"	"AI prompt engineering"	1.22.33.44	7 mins ago
AI prompt engineering	AI prompt engineering	AI prompt engineering	1.22.33.44	7 mins ago

In addition to general search statistics at the top, the search history page has three tabs:

- **Last 50 Searches** The last 50 searches, ordered from most recent to oldest.
- **Top Last 7 Days** The most frequently-used search terms in the last week.
- **Top Last 30 Days** The most frequently-used search terms in the last month.

NOTE: When a search returns no results, SOE will try again with the search terms enclosed in quotes. This results in duplicate entries in the query log.

Google Analytics

SOE administrators can view detailed usage, historically and in real-time, by integrating [Google Analytics](#) (GA). The GA integration allows you to track search history, page views, sessions, unique users, and more.

Download user search history

Admins can use this [Python API script](#) to query all searches and create a .CSV data file. The script is read-only, with no ability to change or add content on your site. We offer this script for your usage with no additional support.
